PROFESSIONAL SUMMARY

Computer Science student at USAL University with a strong academic track record, including ranking 18th in the Lebanese Baccalaureate and consistent honor-list placement. Organized and dependable, with solid problem-solving, teamwork, time management, and leadership skills. Eager to apply academic strength and analytical thinking to solve real problems in modern tech environments.

PROFESSIONAL EXPERIENCE

Integrated Digital Systems (IDS), Internship

Sep 2025 – Oct 2025

Worked on full-stack web development using ASP.NET Core 9 (C#), React (TypeScript), and Microsoft SQL Server 2022. Built APIs, integrated databases, and developed user interfaces. Delivered a To-Do List application and a small e-commerce back-office system connecting React frontend with .NET backend and SQL database.

42 Beirut, Programming Trainee

Feb 2025 – Mar 2025

Completed an intensive coding program simulating a real work environment. Developed C projects in Linux using Bash and Git, applying fully self-directed learning with peer-based code reviews. Participated in rush projects, debugging sessions, and problem-solving challenges.

SimBrain Solutions, Internship

Feb 2026 - March 2026

Developed advanced MySQL solutions, including complex stored procedures, query tuning, and database optimization. Assisted in migrating and redesigning a large legacy database system (200+ tables), improving architecture, scalability, and data integrity.

EDUCATION

USAL

Oct 2023 – Jun 2026

Bachelor of Science in Computer Science

GPA 3.8

PROJECTS

GestureVision — Intelligent Video Control System

AI-powered video control using real-time facial and hand recognition. Auto-pauses when eyes close and adjusts volume with finger gestures. Focused on HCI + computer vision for touch-free interaction.

Tech: Python, MediaPipe, Computer Vision, Gesture Recognition, AI

Galaxy Go — Interactive Space-Themed Web Platform

Multi-page space-themed website with three mini-games (Quick Quiz, Space Explorer, Star Match) plus pages for planets, stars, store, and About. Designed for educational and entertaining user engagement with responsive layout.

Tech: Flask, HTML, CSS, JavaScript, Bootstrap

Flag Runner — 3-Level Platformer Game

Platformer where players navigate floating islands to capture a flag. Features evolving difficulty with static, moving, and rotating platforms to challenge timing and precision.

Tech: Unity, C#, Game Mechanics, Level Design, UI Design

Network Configuration & Management — Cisco Packet Tracer

Designed a small network with routers, servers, and PCs. Implemented VLANs for segmented traffic, routing protocols for inter-network communication, and SSH for secure remote access.

Tech: Cisco Packet Tracer, Router Configuration, VLAN, SSH, Server Configuration, DHCP

Find My Meds

Built a full-stack medication availability and pharmacy inventory management system using ASP.NET Core 8, Entity Framework Core, and Microsoft SQL Server, featuring real-time medication search, secure authentication and authorization, role-based dashboards, and RESTful APIs; also integrated background services for stock monitoring and notifications, optimized database performance and scalability, and streamlined pharmacy operations by helping users quickly locate medications across pharmacies.

Tech: ASP.NET Core 8, C#, Entity Framework Core (EF Core), Microsoft SQL Server, RESTful APIs
